

YOU ARE UNIQUE, AND SO ARE WE!

ANTIMICROBIAL ADDITIVE IN ALL OUR PRODUCTS !

PG Hardwood Flooring is committed to ensure the safety and well-being of their clients and business partners. Therefore, we are very proud to announce that **we will be adding an antimicrobial additive to all our prefinished and pre-oiled products**. This exclusive proprietary patented technology made of silver ions held in a glass matrix is creating an efficient and natural antimicrobial product.

This surface protection serves as a complementary measure to daily cleaning without creating a sterile environment. This is **eliminating 99.995% of bacterial infections like MRSA, E. Coli and listeria**.

Many of the used active substances have been successfully tested against enveloped viruses like **the influenza, the avian flu and the SARS**. Although there is no available test against the **Covid-19**, there is every reason to believe that these active substances would be efficient against this new virus.

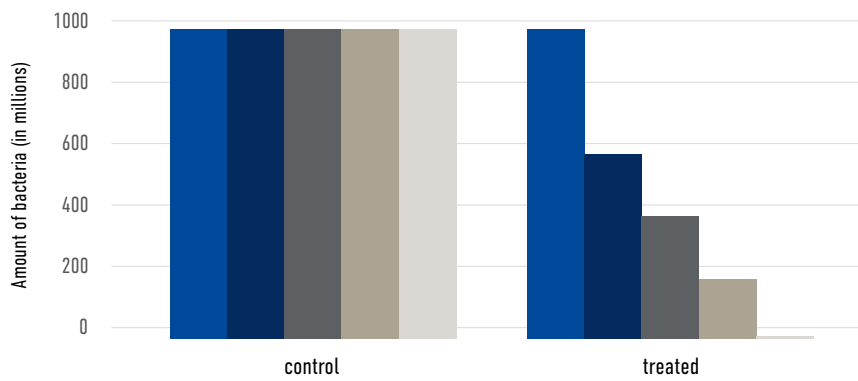

Samples were tested using the JIS 2801:2000 method for the E. Coli. Tested products with our antimicrobial surface protection are presenting a bacterial reduction of 99.995% **as fast as 6 hours after initial exposure**, in contrast to an untreated surface which is showing a bacterial growth in the 6 following hours.

Recent independent tests showed that **time, scratches and wear do not affect the antibacterial additive's performance, as well as chemical cleaners** like bleach, disinfectants and alcohol. Even aggressive industrial products like MEK (methyl ethyl ketone) do not affect the antimicrobial properties of our products.

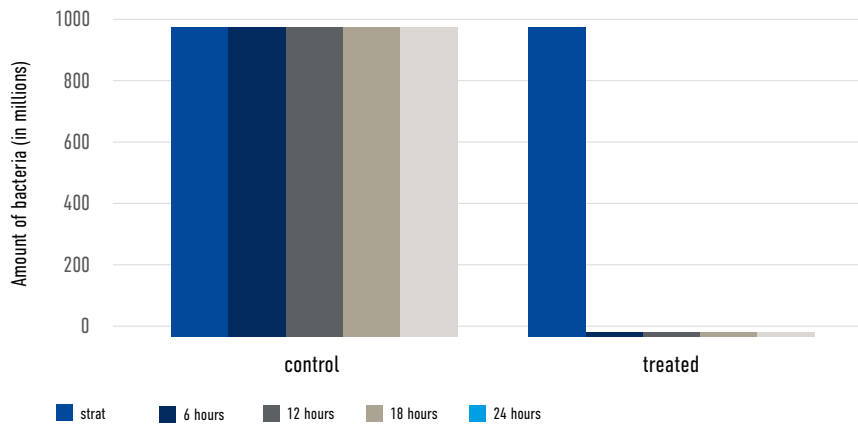

This antimicrobial additive allows to:

- **Eliminate micro-organisms** provoking contamination and infections;
- **Eliminate bacteria** responsible for odors and stains;
- **Protect the product from degradation**, prolonging the lifespan.

ANTIMICROBIAL RESULTS AT 4 °C

ANTIMICROBIAL RESULTS AT 35 °C

This additive in our prefinished and pre-oiled products is offering an invisible barrier that will **protect you as well as your precious family members.**
